

Smart packs

We survey some versatile new backpacks fit for every use and environment.

TO SERVE AND PROTECT
KOMPERDELL TOURPACK

Layers and chambers of flexible, breathable foam conform to your sternum and spine to protect from injuries during mountain biking. Available in six sizes, you can carry your glasses, phone and biking utensils in the expandable pocket for day trips, or choose the Litepack for shorter tours.

POWERED UP
MAMMUT LITHIUM PRO

Made for mountain training and hiking, this super-light backpack has everything you might need: pole holders, detachable rain cover, hydration compatibility, loads of pockets and more. The U-frame suspension and ventilated back means moving with ease and comfort and focussing on the task at hand.

WHOLE IN ONE
MISSION WORKSHOP THE INTEGER

The minimalist profile hides the ability to bring all kinds of camera equipment, a laptop and other gear. Weatherproof, durable, customisable and accessible in a variety of ways, this take-anywhere backpack also comes with a lumbar panel with a pass-through to attach to roller luggage.

FLUID MOVER
HYDRO FLASK 20L

Your body is made up of about 60% water, and this feature-packed piece helps keep it that way. An insulated water reserve keeps three litres of water cool and refreshing for over four hours in a leak-proof, puncture-resistant and lightweight design.

MISSION ACCEPTED
TRIPLE AUGHT DESIGN FAST PACK
SCOUT SPECIAL EDITION

This rugged military/mountaineering combo boasts a host of handy, quick-access compartments and a HDPE framesheet that allows higher positioning. This version is made with waterproof, abrasion- and tear-resistant Dimension-Polyant X50 in camo print.

BEACH READY
CGEAR SWITCH TRANSITIONAL

This 20L bag converts to a sand- and water-proof mat. The proprietary weave system allows sand, dirt and dust to fall through the fabric and only in one direction, making it a comfortable beach mat that frees itself of sand as you pick it up to revert to using it as a bag.
